Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS	THINKS
Is my credit card application approved?" "What are the eligibility requirements for this card?" Why is the approval process taking so long?"	- I hope I get approved quickly to manage my expenses." "I am worried about my credit score." "Is the online application process safe and reliable?"

	PERSONA NAME <i>(Role / User Type)</i>	
• DOES • Browsing multiple bank websites to compare credit card offers. Checking their credit score regularly. Submitting documents online and waiting for updates. •		• FEELS • Anxious about the approval decision. Hopeful that the process will be fast. Frustrated if the process is complicated or unclear. •
