

Problem-Solution Fit

Date	30-06-2026
Team ID	
Project Name	Credit Card Approval Prediction
Maximum Marks	5 Marks

Problem-Solution Fit Canvas:

Use the framework below to ensure your proposed solution accurately addresses the root causes, behaviors, and limitations of your target audience. Fill out the canvas in the respective boxes just like the original visual template.

1. Credit card applicants, specifically individuals seeking quick loan approvals and first-time applicants	6. Limited financial documentation, lack of credit history, and limited access to professional financial advice.	5. Traditional Banks: High reliability but very slow. Fintech Apps: Fast but sometimes lack security transparency.
2. . Long waiting periods, manual verification delays, and high rejection rates due to lack of transparency. (Frequency: High)	9. Manual, error-prone data verification processes and outdated credit scoring legacy systems.	7. Researching online forums for reviews, checking multiple bank websites. (Intensity: High)

3 . Urgent need for funds, financial emergency, or desire for better credit limits.	10An AI-driven automated system that provides real-time credit score analysis and instant approval decisions.	8. Online: Social media ads, search engines. Offline: Bank branch visits, word-of-mouth.
4. Before: Anxious, uncertain, frustrated. After: Relieved, confident, satisfied.		OFFLINE
