Solution Architecture Diagram:

Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer. Fill in the specific technologies and components for your project directly into the boxes to create your architectural diagram.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
Presentation Layer	<i>User interface allowing applicants to apply and view status.</i>	<i>React.js</i>
API Gateway	<i>Acts as a single entry point to manage and route requests to backend services.</i>	<i>API Gateway Service</i>
<i>Microservices</i>	Manages core logic like User Authentication, Application Management, and Credit Scoring.	<i>Python(Flask/Django), Scikit-learn</i>

<i>Database</i>	Securely stores applicant profiles, transaction history, and historical data.	<i>PostgreSQL</i>
